How to Connect Your Documents to Your After-Hours AI

The AI answers callers using the documents you upload. Keep them current and it gives accurate answers.

What to upload

• Price list or service menu

• FAQs

• Policies: cancellations, warranties, payment, service area

• Hours, holidays and emergency rules

Formats: PDF, DOCX, TXT. One topic per file works best.

Steps

1. Log in to your dashboard.

2. Open **Knowledge** > **Upload documents**.

3. Drag in your files, or click **Browse**.

4. Wait for each file to show **Ready**.

5. Click **Test a question**, ask something a caller would ask (for example, "How much is a drain cleaning?"), and check the answer.

6. Click **Publish**. The AI uses the new files on the next call.

Updating

• To change prices, upload the new file and delete the old one. Don't keep two versions.

• Re-test after every change.

Tips

• Write prices as plain numbers ("$149"), not images.

• Put urgent rules at the top: "If a caller reports a gas leak, tell them to call 911."

• Remove anything you don't want callers told.

Resellers

Upload documents per client account. Switch clients from the account menu first, so each client's AI only uses its own files.
